

Year 13 Work Spalding High School
Work for 4th May to 22nd May

For Years 11 and 13, work has only been set where appropriate to ensure that students have completed the course content as it may well be of use to them in their next steps e.g. transition to A Level or in the event that students decide to sit examinations because they feel that their centre assessment grades do not reflect their ability. Further to the guidance from Ofqual, there is no requirement to set additional tasks for these students for the purpose of determining centre assessment grades. Equally, Year 11 and 13 students are not required to complete any outstanding NEA work. For these reasons, not every subject has provided instructions below.

Business:

Once you have covered these topics the course is complete and there is no more work to do. Well done to everyone!

7.6

Part 1: social environment

Part 2: CSR

Part 3: technology

7.7

The competitive environment

All the presentations are on the VLE and ready for you to work through.

Chemistry:

The work below is simply to complete the course. No further work needs to be done beyond what is below.

Feel free to scan in any papers that **you have already completed** for me to mark and send, especially Paper 3 June 2019. Please send back the 12.3 planning PAG for me to look at.

Mr Murphy has put some combined analysis questions onto the VLE for you to do with the answers. Use whatever text books/revision guides that you have to look at c-13 NMR and H-NMR (Proton NMR) pages 84-89 (for C-13 NMR and pages 90-97 for proton NMR). Other pages which may be useful include pages 100-103 of combined structure problems.

Any problems with anything please keep in touch as I have made each group an email contact so I can pass info onto you as quickly as possible. Contact either myself or Mr Murphy via school email if any problems.

Geography:

Your individual teachers will email you directly (on school accounts) the work that you are required to undertake for each lesson when you are working at home. Please check your email daily and contact Mrs Bennett, Miss Lee or Mrs Rogers if anything is unclear.

History:

Complete all reading and all activities from Chapter 7 photocopies – see Phase 2 work.

Physics:

Most of you have been in contact with Mrs Gregory or Mrs Haunch as needed, so please continue to do this as you complete the course. You may complete the exam questions given as part of the course or the extra mock papers to check your understanding of this work. The mark schemes are on the VLE for the extra mock papers or you may email Mrs Gregory if you do not have access to the VLE. Mrs Gregory can also email the answers to the medical questions provided to finish off the course. If you have any further questions, you may email Mrs Gregory or Mrs Haunch on:
